

# INFORMATION TECHNOLOGY

Apextech helps you work more comfortably and successfully with well-implemented and well-managed technology.

## DATA ANALYTICS

Business intelligence systems empower business users to make better decisions. Visualization tools make organizational data easier to understand. We also help make user interactions with data easier and more flexible, thereby reducing the dependence on IT resources for reporting and analysis. We can integrate multiple sources of data to provide a comprehensive view of your organization's data.

*Services: project management, requirements gathering, data-warehouse/data-mart developing, reporting, dashboards, OLAP development, integration of multiple data sources, testing, training and documentation.*

## SHAREPOINT PORTAL/ COLLABORATION

Information sharing, document management, collaboration and portal needs can easily be addressed through the implementation of Microsoft Office Sharepoint Services (MOSS). Apextech recommends, integrates and implements MOSS to improve workplace efficiency. Microsoft Sharepoint also integrates with back office systems to provide application, reporting, dashboards and data access to many users through a familiar interface. Enterprise-wide search capabilities exist to improve access to information. Personalized content delivery can also minimize information overload.

*Services: project management, requirements gathering, system installation, integration, customization, setup, process definition, testing, training and documentation.*

## INFORMATION PROCESS ANALYSIS

Managing information in today's business environment can be challenging and complex. Many organizations struggle with incompatible systems, duplication of efforts and inability to access relevant information. Apextech can improve workplace efficiencies by identifying organizational information flow, discovering information repositories, uncovering bottlenecks and inefficiencies.

*Services: requirements gathering, analysis and documentation.*

## FINANCIAL SYSTEMS

Implementing financial systems in today's complex business environment requires careful planning and a disciplined approach. Apextech provides financial system implementation services to organizations to insure a system's success. Our comprehensive understanding of accounting concepts and processes enables us to deliver financial systems that exceed expectations.

*Services: project management, requirements gathering, system installation, financial module setup, application and report customizations, report development, external system integration, testing, training and documentation.*

## WEB APPLICATION DEVELOPMENT

Organizations that do business in specialized areas often require custom systems to improve performance. Apextech develops custom web applications to meet these specific needs.

*Services: project planning, requirements gathering, application and database development, testing, training and documentation.*

# ABOUT US

Founded in 2002, Apextech analyzes and addresses your business processes in order to effectively modify or augment your capabilities. Our solutions are forward-thinking, flexible and scalable.
